PROFESSIONAL SUMMARY

Full Stack Developer with hands-on exposure across the Software Development Life Cycle (SDLC), including requirement analysis, feature development, REST API integration, and production defect diagnosis and resolution in an Agile environment. Proficient in Python, JavaScript/TypeScript, and SQL, with working knowledge of Java, unit testing concepts, and RDBMS/NoSQL databases. Completed a 1-year Java Full Stack Developer internship delivering client-facing features and quality-focused production support. Strong foundation in data structures, algorithms, and problem-solving, with a track record of building end-to-end, well-tested projects.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, Java (Basic)
- **Frameworks & Libraries:** React.js, Node.js, FastAPI, REST API
- **Databases:** MySQL, PostgreSQL
- **Cloud & DevOps:** Git, GitHub
- **Tools & Testing:** VS Code, Postman
- **AI Tools :** Gen AI, Prompt AI, Claude, ChatGPT

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Intern — iGenuine

June 2025 – May 2026

- Contributed to full-stack development and support of client-facing web applications using Java, JavaScript, and SQL, translating business requirements into technical implementation.
- Built and maintained application features and REST API integrations, working across the front end and back end to manage data flow with relational databases.
- Diagnosed and resolved implementation and production issues to ensure minimal client impact, following security and data protection best practices.
- Collaborated with cross-functional teams in an Agile environment, supporting client onboarding and system integration activities.

PROJECTS

PlacementGPT (Major Project) | [GitHub Repository](#)

React, Firebase, FastAPI, Python

- All-in-one placement preparation platform offering resume analysis, coding practice, mock interviews, a job portal, and an AI-powered personal assistant for students.
- Built a responsive React front end integrated with Firebase for authentication/data and FastAPI-based backend services powering AI-driven features.

CafeFlow | [GitHub Repository](#)

React, FastAPI, MySQL/PostgreSQL, Java

- Cafe billing system with two interconnected portals — Customer and Admin — for real-time order placement, billing, and management, backed by FastAPI REST APIs and a relational database.

AI-Powered Sentiment Analysis System | [GitHub Repository](#)

Python, FastAPI, Machine Learning

- Analyzes user feedback to determine sentiment and generate actionable recommendations, with the trained ML model exposed as a REST API via FastAPI.

EDUCATION

B.Tech — Audisankara College of Engineering and Technology (JNTUA) - Gudur

2022 – 2026

Computer Science and Engineering (Artificial Intelligence) | **CGPA: 7.82 / 10**

CERTIFICATIONS

- SQL Advance — HackerRank
- Frontend Development — edX (IBM)
- Python Programming — edX
- AWS Cloud Essentials — edX (AWS)

ACHIEVEMENTS & EXTRACURRICULARS

- Building the Web Application using the AI (ChatGPT, Claude, Gemini, Cursor)
- Keen interest in hackathons and staying current with emerging technologies.
